8. The method according to claim 7 wherein said moisture removal further comprises providing a heater.

5 9. The method according to claim 8 wherein said moisture removal further comprises providing a blower to move air.

10 10. The method according to claim 1 wherein said moisture removal comprises providing a heater.

11. The method according to claim 10 wherein said moisture removal further comprises providing a blower to move air.

15 12. The method according to claim 1 wherein said moisture removal comprises providing a blower to move air.

20 13. The method according to claim 12 wherein said moisture removal comprises providing a dehumidifier to remove moisture from air.

25 14. A dehumidification system for a construction project, comprising:
moisture measurement apparatus for determining moisture content of portions within the construction project;
apparatus for removing moisture from said portions.

30 15. The system according to claim 14, wherein said apparatus for removing moisture comprises a dehumidifier.

35 16. The system according to claim 15 wherein said

apparatus for removing moisture comprises a heater.

17. The system according to claim 16 wherein said
apparatus for removing moisture comprises a blower to
5 move air.

18. The system according to claim 14 wherein said
~~apparatus for removing moisture further comprises a~~
heater.

10

19. The system according to claim 18 wherein said
apparatus for removing moisture further comprises a
blower to move air.

15 20. The system according to claim 14 wherein said
apparatus for removing moisture further comprises a
blower to move air.

20 21. The system according to claim 20 wherein said
apparatus for removing moisture further comprises a
dehumidifier device.
